The author of this thesis was born on November 17th, 1976 in Meppel, The Netherlands. He spent his youth here while attending high school (VWO, RSG Staden Esch, Meppel, The Netherlands) and graduated in 1995. Subsequently, he studied medicine at the University of Groningen, The Netherlands. His interest for orthopaedics grew after his intern-ships and in 2002 he started a research project on an osteomyelitis model in rabbits at the Department of Orthopaedic Surgery of the VU University medical center (Supervisor: Prof. dr. PIJM Wuisman (†)). After graduation in 2003 he started his first job in the same hospital as an orthopaedic resident. During this residency, the PhD project as described in this thesis was created and in 2004 he started working full time on the project (supervisors: Prof. Dr. PIJM Wuisman (†) and Prof dr. RA Bank) The project has resulted in several publications, a number of presentations at international conferences and this thesis. As a part of his training for Orthopaedic surgery he started a residency General Surgery at the Tergooi Ziekenhuizen in Hilversum (Head of Department: Dr. J.P. Eerenberg) in 2008. In 2010 he will continue his orthopaedic surgery training at the Medisch Centrum Alkmaar, Alkmaar, The Netherlands (head of Department: Dr. B.J. Burger). He lives with his partner and two daughters in Utrecht, The Netherlands.
